VIRES Srl via N. Tommaseo 61 - Collegno (TO) ITALY / VAT 01413180017 / [+39 011 411 1718](tel:+390114111718) / [info@vires.it](mailto:info@vires.it)

# VIRES Srl

Manufacturer of industrial coatings, resins and solvents

Since 1960, VIRES has been the trusted **supplier of resins and coatings for industrial floors** in Northern Italy and beyond. We develop our products to meet the needs of professionals, combining our company's extensive experience and know-how with innovation and research.

Our commitment to customisation means we can **tailor our wide range of solutions** for different types of flooring and applications to meet your specific needs.

Production occurs solely at our **manufacturing site in Collegno (TO), Italy**.

ISO 9001:2015 Certified Company

## CHOOSING THE RIGHT INDUSTRIAL FLOORING

Resin floors are excellent for **production areas, offices, shops, and food processing facilities**. They are **easy to clean and maintain, hygienic, and can be customised** to meet the desired aesthetics and user requirements

The choice of products for creating a **high-performance industrial floor** depends on several factors, including environmental and usage conditions such as humidity, elasticity, temperature, mechanical and chemical resistance, and resistance to acids and/or oils.

High-thickness flooring

Low-thickness solvent-based system

## FLOORING COATINGS AND RESINS

Industrial flooring must withstand heavy loads and significant dynamic and static stresses, such as those caused by trolleys or forklift trucks. Due to the variability in use, each industrial floor must be designed and manufactured for its intended **function and performance**.

We formulate our products and resins for **industrial flooring according to customer specifications**.

Our range includes coatings with or without solvents, non-slip surfaces, low or high thickness, acid-proof, dust-proof, and self-levelling properties **ideal for various sectors**, such as:

- food industry, canteens, laboratories and restaurants
- car industry and workshops
- depots and warehouses
- electronics industry
- pharmaceutical and healthcare facilities
- manufacturing industry
- logistics

## OUR RANGE

- Low thickness primers
- Trowel applicable skim coatings and resins
- Horizontal and vertical levelling mortars
- Cement mortars
- Tile fillers
- Skirting resins
- Sealants and adhesives
- Water- and solvent-based epoxy finishes
- Solvent-free self-levelling resins
- No-scratch clearcoats
- Acrylic and synthetic resins
- Multilayer systems
- Transparent high build embedding resins
- Water- and solvent-based enamels
- Fixatives and impregnating agents
- Decorative coatings
- Roofing resins
- Waterproofing for terraces and balconies
- Water- and solvent-based polyurethane finishes
- Paints and quartzes
- Anti-corrosion enamels
- Glazes and resins for swimming pools and tanks

## EXAMPLES OF APPLICATION

Self-levelling finish

Water-based epoxy resin flooring

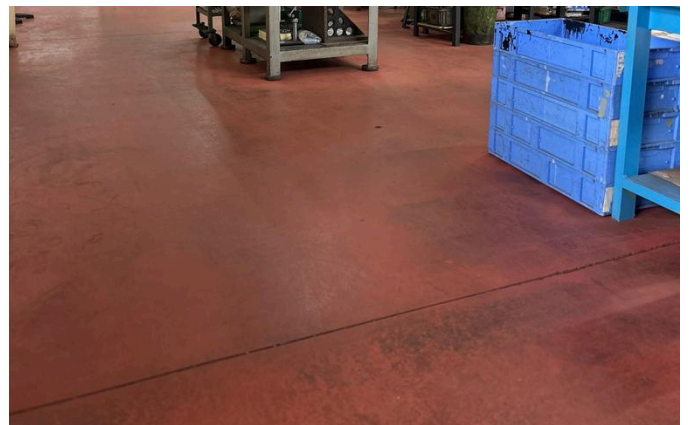

Horizontal signage with excellent grip

Microcement flooring for offices

Water-based paints for interiors and exteriors

Filmogenous for workshop
